N KIRAN

DATA ANALYST | OPERATIONS & REPORTING

PROFILE

Experience working with raw data across attendance, LMS, scheduling, and stakeholder workflows. Strong focus on data accuracy, process improvement, and backend systems, with hands-on expertise in building dashboards and automating reports to enable clear, data-driven decision-making.

WORK EXPERIENCE

JUNE 2024 - DECEMBER 2025

Yzerly (EdTech – Corporate Learning & Training)

1.5 YEARS

- Managed end-to-end delivery of 50+ corporate training programs for 20+ enterprise clients, handling LMS updates, attendance tracking, and pre- and post-evaluation progress.
- Cleaned, validated, and transformed data from 20,000+ learner records into dashboards and structured reports for management and stakeholders, improving visibility and reporting accuracy.
- Automated routine reports and internal workflows, reducing manual effort by 90%, minimizing data errors, and improving coordination with Key Account and Training Managers.

FEATURED PROJECTS

CSAT Dashboard – Engagement

- Built a live CSAT dashboard consolidating 70,000+ participant responses, reducing manual reporting effort by 95% and enabling real-time leadership insights.

Delivery Dashboard – Performance

- Developed a CEO-level dashboard covering 150+ training programs, cutting manual reporting by 90% and supporting data-driven capacity planning.

Cohort & Individual Training Reports

- Delivered cohort and individual reports for 20+ batches, covering multiple departments and programs, reducing report preparation time by 50% through automation.

Email Evaluator

- Automated CEFR-based evaluation for 1,000+ emails per batch, reducing assessment turnaround time by 90% with consistent, standardized scoring and humanized feedback.

Internal File Overview

- Centralized operational data for 20,000+ participants across multiple batches, reducing manual performance tracking and reporting effort by 90% through formulas.

Certificate Mapping System

- Eliminating near-100% manual mapping errors in certificate generation for 200+ participants, cutting processing time from hours to minutes per batch with mail merge integration.
