N KIRAN

BUSINESS ANALYST | DATA ANALYSIS | REPORTING & AUTOMATION

PROFILE

Business Analyst with 2.6 years of experience transforming business data into actionable insights through dashboard development, KPI reporting, and process automation. Built real-time dashboards, automated reporting workflows, and AI-powered solutions that reduced manual effort by 90% across 20,000+ records and enabled data-driven business decisions.

WORK EXPERIENCE

Data Analyst — Yzerly

Jun 2024 - Dec 2025 (1.6 Years)

- Reduced manual reporting effort by 90% by automating dashboarding and validation workflows across 20,000+ learner records, improving reporting accuracy and operational visibility.
- Enabled faster, data-driven decisions by delivering KPI-driven dashboards and reporting insights for management and cross-functional teams.
- Delivered 50+ corporate training programs across 20+ enterprise clients, coordinating LMS updates, attendance tracking, and evaluation management.
- Streamlined large-scale employee assessment by designing AI-powered email evaluation workflows that improved operational efficiency.

MIS Data Analyst — Wisdom Bridge Management Consultants

Nov 2022 – Nov 2023 (1 Year)

- Improved reporting accuracy by collecting, validating, and analyzing business data from multiple operational sources.
- Supported management decision-making through recurring dashboards and automated reporting workflows.

FEATURED PROJECTS

AI-Powered Email Evaluation System

- Reduced evaluation turnaround from manual review to seconds by designing an automated CEFR-based scoring workflow for 20,000+ employee emails.

CSAT Dashboard

- Cut CSAT reporting effort by 95% with a real-time dashboard consolidating 70,000+ participant responses.

Delivery Dashboard

- Reduced manual reporting effort by 90% with automated KPI dashboards spanning 150+ training programs.

Internal File Overview

- Cut manual reporting effort by 90% by centralizing operational data for 20,000+ participants into a unified system.

Bank Loan of Customers

- Improved reporting accuracy and data reliability by analyzing 79,000+ financial records, performing trend analysis, and generating dashboard-based recommendations on customer financial patterns.
