PROFESSIONAL SUMMARY

Business Analyst with 2.6 years of experience delivering business insights through data analysis, dashboard development, KPI reporting, business reporting, and process automation. Proven experience in improving reporting accuracy, streamlining operational workflows, and enabling data-driven decision-making through automated reporting solutions, stakeholder collaboration, and business-focused analytics.

KEY ACHIEVEMENTS

- Reduced manual reporting effort by 90% through automated reporting workflows across 20,000+ learner records.
- Developed executive dashboards supporting 150+ training programs across 20+ enterprise clients.
- Designed AI-powered evaluation workflows processing 20,000+ employee emails, reducing evaluation turnaround from manual review to seconds.
- Consolidated 70,000+ participant responses into real-time dashboards, reducing CSAT reporting effort by 95%.

CORE COMPETENCIES

Business Analysis • Process Improvement • Stakeholder Management • Cross-Functional Collaboration • Decision Support • Operational Reporting • Reporting Automation • Performance Analysis

TECHNICAL SKILLS

Analytics & Reporting: Data Analysis • KPI Reporting • Dashboard Development • Business Reporting • Data Cleaning • Data Validation • Data Visualization

Automation: Workflow Automation • Process Automation • AI-Powered Workflow Solutions • Real-Time Reporting

Tools: Excel • Google Sheets • Google Slides • Make.com

PROFESSIONAL EXPERIENCE

Data Analyst | Yzerly

Jun 2024 - Dec 2025

Environment: Excel • Google Sheets • Google Slides • Make.com

- Automated dashboarding and validation workflows for large-scale learner data, eliminating manual reconciliation and shortening reporting cycles for management and cross-functional teams.
- Delivered business insights by analyzing training and operational data, identifying performance trends, and supporting KPI-driven decision-making for management and cross-functional stakeholders.
- Improved delivery efficiency for 50+ corporate training programs across 20+ enterprise clients by coordinating LMS updates, attendance tracking, and evaluation processes.
- Designed and implemented AI-powered email evaluation workflows for large-scale employee assessment programs, improving operational efficiency.

MIS Data Analyst | Wisdom Bridge Management Consultants

Nov 2022 - Nov 2023

- Improved operational reporting by collecting, validating, and analyzing business data from multiple sources to ensure reporting accuracy.
- Developed recurring dashboards, reports, and performance visualizations that supported management reviews and data-driven business decisions.
- Streamlined reporting workflows through automation while delivering actionable insights to stakeholders, improving reporting efficiency and data quality.

KEY PROJECTS

AI-Powered Email Evaluation System *(Make.com • Google Sheets)*

- Designed and implemented an automated CEFR-based email evaluation workflow for 20,000+ employee emails.
- Automated extraction, scoring, ranking, and trainer-style feedback generation using Make.com and Google Sheets.
- Reduced evaluation turnaround from manual review to seconds, processing approximately 100 emails in 15 seconds without workflow failures.

CSAT Dashboard *(Google Sheets)*

- Developed a real-time dashboard consolidating 70,000+ participant feedback responses across multiple programs and years.
- Automated validation and trend reporting across monthly, quarterly, yearly, industry, and company dimensions.
- Reduced manual CSAT reporting effort by 95%, providing leadership with real-time performance insights.

Delivery Dashboard *(Google Sheets)*

- Built dashboards tracking KPIs across 150+ training programs covering multiple industries, products, and delivery modes.
- Implemented automated validation logic to improve reporting accuracy and data reliability.
- Reduced manual reporting effort by 90% while supporting operational planning and capacity management.

Internal File Overview

- Centralized LMS, attendance, evaluation, and performance data for 20,000+ participants into a unified reporting system.
- Automated reporting and readiness analysis, reducing manual reporting effort by 90% through automated formulas.

Certificate Mapping System

- Automated certificate generation and bulk mail-merge creation for 20,000+ participants.
- Eliminated manual mapping errors and reduced certificate turnaround time from hours to minutes using validation and role-based automation.

Cohort & Individual Training Reports

- Automated cohort and participant-level reporting across 20+ batches.
- Reduced report preparation time by 50% using standardized templates and automated workflows.

INTERNSHIP PROJECTS

Bank Loan of Customers *(Excel)*

- Analyzed 79,000+ financial records to improve reporting accuracy and data reliability.
- Performed data validation, financial trend analysis, dashboard reporting, and generated recommendations based on customer financial patterns.

Dialysis of Patients *(Excel)*

- Analyzed 15,000+ healthcare records to improve reporting accuracy and data quality.
- Performed data validation, reporting analysis, and generated operational recommendations to improve service performance.
